

## case-study / OLIVE Media

- providers.
- education sector.
- learning from happening.
- of their solutions.
- Some of the common problems are:
- Language
- Relevance
- Data protection
- Longevity

• Our client wanted to align their learning platform more effectively with the requirements of higher education

• To make their platform more attractive to universities and colleges, they required a more comprehensive understanding of the needs of tutors and students in the

• Although digital technologies can bring many benefits to learning, they can often get in the way and prevent

• Without a deep understanding of the student experience and higher education cycle, technology vendors find it difficult to convince budget holders of the potential value

## our approach

- currently facing education providers.
- language of their target customers.
- key stakeholders.
- potential for upselling.

• We began by outlining the key strategic priorities for the higher education sector. This gave our client a clear understanding of the opportunities and challenges

• We then mapped the features of their platform with specific university priorities. This made it possible for our client to begin talking about their platform in the

• We also provided our client with an overview of the tutor experience in universities. This enabled them to see which aspects of their platform had the greatest potential to make tutors' lives easier, and thus achieve buy-in from

• Having clarified the higher education environment, we proceeded to rebrand our client's platform and marketing materials in an appropriate language and format.

• By aligning the platform's diverse functions under one core brand name, our client was able to present it as a complete solution that could be purchased in its entirety or as specific, yet related, applications. This increased the

- education teaching and learning.

# our impact

• Our work gave our client an in-depth understanding of how their product could address specific needs and issues in higher

• Our rebranding of their marketing and communications materials enabled our client to pitch their product more effectively to potential customers in the higher education sector.

## myKademy.

Learning can happen anywhere. Extraordinary learning happens with myKademy.

myClassroom connects tutors and learners in a secure, scalable and collaborative online classroom and provides engaging experiences, no matter where your students are.

### myCoach.

myKackenry.

Carriero Carriero

mellacherry

"Getting my staff to engage in their health & safety compliance training can be difficult. What I want is something more experienceefficacy of training"

### myClassroom enables

- Features 2

"Pre-recorded content is great, but face-to-face teaching is what I'm good at. It's why I came into teaching in the first place, and it's where transformations happen. I need a stable, online classroom I can trust will work for me and my students."

"Ding provided some excellent, out-of-the-box thinking to determine which of our products sat where within the Higher Education framework, and how best to showcase them. They listened and understood what we wanted, went away and delivered exactly that.

We would highly recommend working with them if you need expert advice pertaining to understanding and delivering in the HE sector."
